

what would you like to see change from your involvement in IAP?

we hope to see that people will understand Gender Based Violence so it becomes less stigmatised and less of a taboo subject, leading to people speaking up about there experiences and raising more awareness

Question:

What are you planning/
doing on the GBV project?

**SILENCE =
VIOLENCE**

Answer:

We are currently in the process of getting a survey based on GBV approved. After the the survey is approved we will try to distribute the survey to people aged 12-25 and then will take those statistics in an animation on GBV to spread awareness of GBV. We will then use the statistics and the animation to create a workshop on GBV which will then be trialled around high school. This will be taking place, the survey and the workshop, in the south Lanarkshire area.

How could schools most effectively tackle awareness raising/ education around gender-based violence?

start doing talks in school, workshops and have people who work with gender based violence organisations, who are professionals and people who have experienced it to fully understand it and the effects it can have on people.

explain the various levels of GBV there is

Question:

**How early should we teach
kids about GBV?**

Answer:

I firmly believe we should teach kids as young as first year because in high school they get a subject called Personal Social Education (PSE) and this is a place where they already explore topics like this already so they should also teach kids about GBV.

Question:
What does inclusion mean
to you ?

Answer:

Inclusion means being
involved in something and
being accepted.
